Whiteboard Cleaning Set

Milacor®

This set contains: 1 Microfiber Cleaning Cloth, 5 Boardmarker, 1 Cleaning Spray

Care Instructions for Milacor Whiteboard Finish

Drying Time & Marking

1. Markings may not be applied to the surface until approximately **7 DAYS** after completion by user! Allow paint to completely harden to ensure long term sustainability.

2. The marking of the surface may only be applied by special board markers. **DO NOT USE PERMANENT MARKERS.** After long-term tests we can highly recommend the following markers: Pilot Board Master and Edding Board Marker 250.
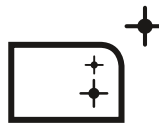

Milacor Care Accessories*

article	art.-no.
Milacor Whiteboard-Finish Cleaning Spray	1065
Milacor Microfiber Cleaning Cloth	1060
Pilot Boardmarker Set (5 Marker: Red, Blue, Green, Black, Orange)	1134

Removal of Markings

1. Whiteboard surfaces should always be thoroughly cleaned after each use.

2. The markings can be removed without residues **DIRECTLY OR AFTER A SHORT PERIOD** (up to several hours) using a dry microfibre cloth with circular motion and light pressure. **IMPORTANT:** Do not clean the markings with polluted cloth.

3. With appropriate care, markings can be removed from the surfaces even after several weeks. Any existing markings on the surface can be removed by means of Milacor Whiteboard Cleaning Spray. Simply spray on the product and allow to take effect for a short period, then treat with cloth or sponge. **IMPORTANT:** To avoid eye or respiratory irritation simply spray the product into a cleaning cloth. Don't leave the dissolved dirt to dry!

4. DO NOT USE HOUSEHOLD DETERGENTS TO CLEAN WHITEBOARD SURFACES! Household detergents frequently contain silicone often leaving behind a layer of dirt on the surface in the long run which rends to be very difficult to clean.
